

Bee Products

Forever Royal Jelly®

Royal Jelly is a substance derived from the pharyngeal glands of the honey bee. This “super food” of the bees is specially blended with enzymes and fed to each bee destined to become a queen. It is the exclusive food of the queen bee throughout her highly productive life, enabling her to lay up to 3,000 eggs per day during her six-year lifespan. Worker bees eating ordinary honey live only four to six weeks.

Royal Jelly can help support the immune system, increase energy, and benefit the skin and hair. Our Royal Jelly is gathered from dry, remote, high desert regions where pristine conditions provide the ideal environment.

Supplement Facts

Serving Size 1 Tablet

Amount Per Tablet

Royal Jelly, powdered	250 mg*
-----------------------	---------

* Daily Values not established

OTHER INGREDIENTS
